DETAILED ACTION

1. This office action is in response to application 10/780,902 and Amendment filed on 09/21/2006. Claims 1-5, 7, 10-16, 18, 21-36 and 38-40 have been amended. Claims 1- 40 remain pending in the application.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-2, 12-13 and 23-24 (Group 1), drawn to a method/server/program for simultaneous editing at least a portion of a printed circuit board (PCB) design by multiple users comprising **rejection a request from a second client to edit the PCB design** object of a first client, classified in class 707, subclass 8.

II. Claims 3-11, 14-22 and 25-40 (Group 2), drawn to a method/server/program for editing a printed circuit board (PCB) master design during an editing session throughout, which each of first and second users may edit a PCB master design and view edits made to the same PCB master design by the other of the first and second users during the editing session, comprising **transmitting synchronization data** to the first and second clients, **the synchronization data** permitting update of the graphical displays on the first and second clients during the editing session **to reflect the first and second edits**, classified in class 710, subclass 61.

Inventions 1-2, 12-13 and 23-24 (Group 1) and 3-11, 14-22 and 25-40 (Group 2) are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the

Art Unit: 2825

subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed, because Group 2 includes synchronous data transfer. The subcombination has separate utility such as **“transmitting synchronization data to the first and second clients, the synchronization data permitting update of the graphical displays on the first and second clients during the editing session to reflect the first and second edits”**.

3. Because these inventions are distinct for the reasons given above, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
